

1. Number of Comment Line
2. Number of Identifier
3. Number of Keyword
4. Number of Literals
5. Number of Operators
6. Number of Function Prototype
7. Number of Function Definition
8. Number of Loop and Conditional Statement
9. Number of Macro Definitions
10. Number of Preprocessor Directives
11. Number of Standard library function calls
12. Number of Function Arguments
13. Number of Variables declared
14. Number of Data Types
15. Number of empty line between functions
16. Average length of functions names
17. Average length of variable names
18. Maximum length of nested Blocks
19. Maximum length of nested Loop statements
20. Average statements of per functions
21. Average Number of Control flow statements per functions
22. Average Number of Characters per line
23. Average Number of word per line
24. Average number of indentation spaces per line
25. Average number of indentation tabs per line
26. Number of function definition with no parameters
27. Number of function definition with no return type
28. Number of ternary expressions
29. Total number of type cast
30. Total Number of Macro Calls
